Summary

SAP ABAP Developer with hands-on experience in reports, function modules, BAPIs, ALV, OData services, and CDS views. SAP Certified Associate Back-End Developer – ABAP Cloud with exposure to system monitoring and a strong focus on building maintainable, production-ready solutions.

Skills

Technical Skills: SAP ABAP Reports, Forms, BAPIs, FM, ALV, OData, CDS Views,
Technologies & Tools: SAP GUI, Eclipse ADT, BAS, Postman, SAP Cloud Connector.

Experience

IBM, Bengaluru	Feb 2024 - Present
Application Developer SAP ABAP	
- Designed and developed a custom ABAP report to automate configuration of multi-sheet Excel data into SAP tables, improving data accuracy and reducing manual effort. - Built a unified OData service for user access management by analyzing user status through USR02 and resolving lock and password issues using standard SAP BAPIs (BAPI_USER_LOCK, BAPI_USER_UNLOCK, password reset BAPIs). - Developed an OData service to provide transport request insights by consolidating tasks, object names, and descriptions, enabling better visibility for developers and support teams. - Created a proof-of-concept using ABAP RAP and CDS view entities to expose OData services, implementing behavior definitions, associations, and end-to-end service provisioning. - Implemented custom SAP solutions using ABAP Objects and ALV to enhance business processes, maintainability, and system performance. - Developed an OData-based solution for SAP role and authorization validation, performing SoD and BC function checks with automated approval logic.
